SUMMARY

I love many aspects of technology and the web. I consider myself to be a technologist (developer/engineer) with a keen eye for detail and design. I love making intuitive web-based client interactions that look great and function properly across many browsers and devices. I care about performance as much as I do about design, usability, and up-and-coming technologies. My code is always pixel-perfect.

SKILLS

- + HTML5
- + CSS3 *
- + JavaScript *
- + Git & CLI chops
- + Troubleshooting
- + Responsive Web Design
- + Wireframing & Prototyping
- + Cross-browser compatibility
- + Communication & Liaison

EXPERIENCE

Frontend Developer @ tZERO

September 2018 - Present

- Building the next generation Blockchain-based UI using React, Redux, Webpack, Express, and Node.js.

Frontend Developer - Product Page Dev @ Overstock.com

October 2015 - September 2018

Product Page Dev Team:

- Currently handling new feature implementation, A/B Tests, and squishing bugs on product pages.
- Work on a full-stack Node.js, Express, React, Redux mobile web app as well as various client-side repo's.
- Involved in the design process of product with UX and Product teammates.
- Build tools for our Front-end workflow. Such as implementing ES6 and ReactJS tooling to our repo a few years ago.
- Create reusable React components and NPM modules that are used by teams across Overstock.com.
- Tech used: LESS (PostCSS), JavaScript (ES6, ES7), ReactJS, Redux, Webpack, JSON, and AJAX making calls to various APIs. I also use Git on the command line for version control.
- Recently Promoted to Senior Frontend Developer.

Previous Teams: ShopEx Dev, Production Marketing Dev.

Front End Developer - Production @ Overstock.com

October 2014 - October 2015

Production Web Team:

- Working directly with Marketing, Product, and Back-end teams on various projects concerning the homepage of Overstock.com.
- Handle initial front-end development, support and maintenance for Overstock.com microsites, homepage content, and promotional email/content/pages. And take part in QA and on-call when needed.

Freelance Developer and Designer @ Damir Hara Design

March 2013 - Present

<http://www.damirhara.com>

- Helping companies/clients build websites and web apps from scratch or by jumping in the middle of the project. I've worked on everything from simple one-page static websites to full web apps built in AngularJS.

Clients Include: Infowrap.com, Cottonwood Electric, TheChapelMotorcycleShop.com.

Integration Specialist/eCommerce Coordinator @ Experticity

December 2012 - October 2014

- Work with clients, Project Managers and Account Coordinators to handle builds, updates, integration, and technical support on 3point5.com and Promotive.com stores by creating pipe delimited files using Excel.
- Handle multiple technical e-commerce projects with clients alongside PM's and AM's through the staging phase into production.
- Communicate with client from the kick-off call through the completion of project, if needed.
- Manage workflow through JIRA, create tickets as needed and assign to appropriate individuals.
- Work with Software Engineers to develop more efficient tools. Test and implement them into workflow.
- Work with technologies and programs such as: HTML, inline CSS, MySQL, XML, EDI, Photoshop, Excel, Salesforce.com, etc.

Clients include: Zeal Optics, yurbuds, Stan's No Tubes, Carhartt, ArmourBite, One Industries, etc.
